

LDCD Container Dispenser

Cherry's Industrial Container Dispenser automatically dispenses and accumulates collapsed bulk containers at ground level. Operation of the dispenser is fully automatic and only requires the operator to remove a container in the dispenser mode or place a container into it in the stack mode through use of a pallet jack.

- Fully Automatic Operation
- Eliminates manual handling of heavy containers
- Dispenses and Accumulates at Ground Level
- Centralized storage for empty containers
- 10-15 Capacity
- Protective gate
- Push Buttons Control with manual over ride
- Status indicator light
- Safety Rated Foot and Gate Switches Available

LOAD

Open gate to Load or Unload a full stack with a forklift or motorized pallet truck.

DISPENSE

Container is dispensed at ground level, utilizing a manual pallet jack.

STACK

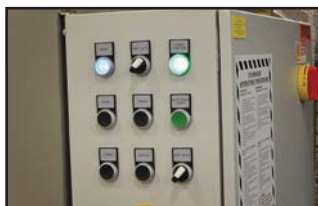

Container Dispenser, ready to accumulate an additional empty container to the stack.
