

# Pallet Changers from Cherry's

Our Pallet Changers offer effective (non-push or squeeze) load transfers from wood to hygienic pallets or vice versa without causing product damage.

## PC Series: 110°

- Unique design gently cradles the load on three sides; pressure or load-sensing settings for different products.
- Advanced hinged-plate assembly grips and lowers the pallet to the floor for pallet jack removal.
- Automated operation via push button controls or touchscreen interface. Switch to manual mode for maintenance and adjust pressure/sensing function.
- Works with all types of plastic and rental pallets including nestable, drum, lipped, and friction plug versions.
- Quick and easy "no touch" pallet to pallet transfers for sensitive loads (i.e. glass vials, bottles, packaging material and expensive ingredients).
- Fully-integrated automated conveyor fed systems with pallet stackers and dispensers available.

PALLETIZED PRODUCT AND EMPTY EXCHANGED PALLETS  
ARE LOADED INTO THE MACHINE AT GROUND LEVEL

TRANSFER PAILS AND ROLLS  
FROM ONE PALLET TO ANOTHER

TRANSFER DRUMS OR OTHER  
PRESSURE-SENSITIVE ITEMS SAFELY

TRANSFER FINISHED PRODUCT TO  
A CHEP OR IGPS RENTAL PALLET.

TRANSFER BAGS OR UNEVEN LOADS TO  
A SLIGHTLY TALLER EXCHANGE PALLET

## PSR Series: 105°

- The PSR pallet-to-pallet changer—NEW extended clamp range handles boxed and block stacked product with heights from 24" up to 96".
- Our least expensive pallet changer—priced to accommodate most budgets.
- Pallet jack accessibility is safer and faster than re-palletizing by hand.
- Rugged and robust this model was built with high volume warehouses in mind. Simple straight forward lever controls for reliable operation.
- 90–105 degree basket rotation allows simple pallet replacement, damage product recovery, load straightening and pallet sorting.

PALLET JACK ACCESSIBLE  
"PALLET RETRIEVER"

## DV Series: 110°

- Continuous duty precision built hydraulic system designed up to 30 pallet transfers per hour.
- Deep V basket supports the load on two sides while adjustable clamping plate secures the product before tipping.
- Press and maintain push button operation via pendant controls; UL Listed electrical panel, optional high style guards and light curtains.
- Pallet to pallet transfers at ground level with manually handling the pallet. Works with boxes, bags and pails, uneven loads or product that can not be fully inverted.
- Fully-integrated automated conveyor fed systems with pallet stackers and dispensers available.
